

ENVIRONMENTAL POLICY STATEMENT

Environmental policy of the company CRE International d.o.o. is focused on prevention of pollution and continuous improvement of environmental protection in the realization of the following processes:

- Project Management,
- Construction Supervision,
- Technical Control of Design.

Our strategy is to achieve this by applying requests of standard ISO 14001 and relevant laws and regulations, and to execute our work without creating harmful environmental impacts. This policy is basis for us to set environmental goals and plan for the following measures for their exercise:

- periodically we identify and review all aspects and our own programmes for compliance and improvement of the environmental management systems in relation to our activities;
- products and services that we deliver to our Clients are in compliance with the requirements of the protection and preservation of environment;
- we encourage our employees to rationally spent the natural resources;
- we inform our business partners and other stakeholders about our commitment to the protection of the environment and about their and our effects on its protection.
